DETAILED ACTION

Election/Restrictions

Claims 11-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse the reply filed August 16, 2004.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3-6, 9 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. Claims 3, 5 and 9 each explicitly exclude the use of O₂. The original disclosure does not provide support this limitation.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1763

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over U. S. Patent 6,207,583 issued to Dunne et al. (hereinafter, Dunne) in view of Japanese Patent Publication 10-268526 (hereinafter, Sato).

Dunne teaches a method to anisotropically etch a silicon-containing organic film. Dunne teaches using a plasma source gas may comprising a fluorine containing compound such as NF_3 , SF_6 or CF_4 in combination with N_2 , H_2 , NH_3 and Ar. See: column 3, lines 30-38, 58, column 4, lines 2, 9-12; column 4, line 62 – column 5, line 10; column 6, line 48 – column 7, line 12; column 7, line 62 – column 8, line 12; column 13 and claim 10.

Dunne does not teach etching with F_2 .

Sato teaches etching with a plasma source gas comprising a fluorine-containing compound. Sato teaches that NF_3 , F_2 or CF_4 may serve as the source of fluorine.

It would have been obvious to one skilled in the art to substitute F_2 for the CF_4 of Dunne because Sato teaches that F_2 and CF_4 are functional equivalents with regard to providing fluorine to a plasma etching gas.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new grounds of rejection. With respect applicant's priority date as it relates to Dunne, the examiner notes that the disclosure of Dunne's provisional application (60/099247) is essentially the same as that of U.S. 6,207,583. See for example page 10, lines 15 –20 and claim 9 of 60/099247.

Allowable Subject Matter

Claims 7 and 8 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
